

SEMI-SOLID EXTERIOR STAINS

These semi-solid finishes provide colors that are a bit more opaque, yet still allow the natural character of the wood to show through.

CEDAR

FOR ADDITIONAL STAINS IN DIFFERENT
TRANSPARENCY LEVELS, TRY:

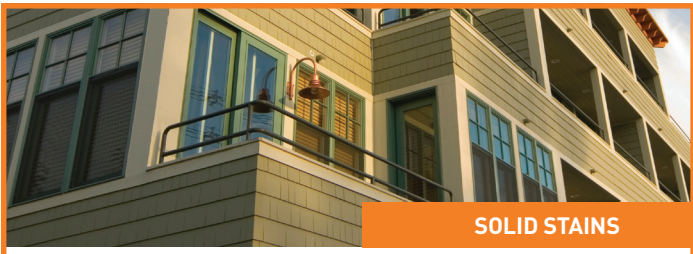

TRANSLUCENT WOOD
TONED STAINS

Accentuate the wood's beauty by lightly toning the wood with transoxide pigments, ideal when a more natural appearance is desired.

SEMI-TRANSPARENT STAINS

Allow the natural grain and texture of the wood to show through while enhancing its appearance with subtle color.

SOLID STAINS

These completely opaque, long-lasting colors allow the natural texture of the wood to show through with the maximum level of UV protection.

DISCLAIMER: All colors represented here are affected by age, light, heat and the printing process; therefore, chips in this literature may vary from the actual coating in the container. To achieve clarity and depth of color, some finishes may require multiple coats. Custom colors may be higher in price. Colors will vary depending on the type, age or condition of the wood. Colors are matched under daylight for accuracy. Colors can vary if viewed in different light sources.
